

Charleston Remote Control Society Alcohol Policy

The Charleston Remote Control Society club (CRCS) **DOES NOT** allow the use of drugs or alcohol at our flying field, club meetings, or contest events.

Anyone caught using drugs or alcohol at our flying field, club meetings, or contest events will be asked to leave and face the possibility of banishment from the club.

We encourage a clean and safe family environment for the purpose of learning and experiencing the fun of motorized remote control model aviation.

The flying of motorized remote control models can inflict severe bodily damage, which may also cause death.

Motorized remote control models are not toys!

Save your alcohol consumption for the times you are not operating any potentially dangerous toys or equipment, including but not limited to, motorized remote control models.

Please Be Responsible!
